Splash Sync Module for Dolibarr

Welcome to the Dolibarr Module's Documentation!

This module implement Splash Sync connector for Dolibarr ERP. It provide access to multiples Objects for automated synchronisation though Splash Sync dedicated protocol.

Summary

This documentation will focus on:

- [Features & Benefits](#)
- [Module Installation](#)
- [Module Configuration](#)

More about Splash

This module is part of [SplashSync](#) project.

For more informations about Splash Sync, the way it works and how you can use it to connect your applications, please refer our [online documentation](#).

Key features & benefits

Dolibarr is one of the major Open-Source ERP project you could find on the web. It's now working for more than 10 years and its very simple approach make it suitable for small and medium business.

This module will give Splash access to Thirdparty, Products, Customer Orders & Invoice.

Centralize your sales workflow

This module was designed to transform Dolibarr into the heart of your business organization. By importing and synchronizing all your sales informations, you can access all you sales in a single place, whatever the sales channels.

Synchronize Products Stocks

Centralize your products stocks from Dolibarr to any kind of applications.

Merge all your customers data

Once all your modules connected, use the Object Linked to identify and merge all your customers profiles into a single Splash entity. This way, all similar informations will be shared and synchronized anywhere, from CRM to E-Commerce.

Consolidate & Simplify your Financial Analytics

Orders and invoices will be automatically imported from your E-Commerce, point-of-sale, or any other applications you may connect!

Your financial analytics is easier... and with no efforts.

Installation

- Download latest stable version here : [Splash Modules](#)
- Copy module contents on Dolibarr htdocs folder (htdocs/splash)
- Enable & Configure the module

Requirements

- PHP 5.6+ | PHP 7.0+
- Dolibarr 3.7+
- An active Splash Sync User Account

Configuration

Enable the Modude

Configuration of you module is available in Settings >> Modules >> Interfaces >> Splash

Impressions Directe	Activer le système d'impression Directe	3.9.0	OFF
Splash	Splash Sync Connector for Dolibarr. Open Synchronisation system for dolibarr (Version > 3.5.x).	1.0.0	ON

Connect to your Splash Account

First, you need to create access keys for you module in our website. To do so, on Splash workspace, go to **Servers** >> **Add a Server** and note your id & encryption keys.

Servers > Servers List

#	Name	Host	Status	Is Active	Options	Updated	Actions
1	 Dolibarr	www.myserver1.com	Connect Successful	Enabled		2017-03-09 14:11:00	    
2	 Prestashop	www.myserver2.com	Connect Successful	Enabled		2017-02-17 23:13:57	    

Then, enter the keys on Module's configuration (take care not to forget any character).

Splash Sync Connector for Dolibarr. Open-Source Synchronisation system for Dolibarr (Version > 3.5.x). More information on www.splashsync.com

Main Parameters

Unique Identifier for this website on Splash Servers (8 Char Max). ⓘ

456468acc0690cdc

Unique Encryption Key ⓘ

NThiOTQyNjA1MGFmNzYuNjU2MzE0NTY1OGI5NDI2MDUwYzdjNl

Enable Advanced Configuration for this Server ⓘ

Setup default Parameters

To work correctly, this module need few parameters to be selected. These defaults values will be used upon objects creation/modification.

Local Parameters

Default Language used by the module	English (United States) ▼
User to use for all remote operations	SuperAdmin ▼
Default Wharehouse used by the module (if not spécified)	Default ▼
Default Bank Account used by the module (if not spécified)	Compte Par Default ▼
Default Payment Method used by the module (if not spécified)	Carte Bancaire ▼ ⓘ

Save

Default Language

Select which language package module should use for communication with Splash Server.

Default User

Select which user will be used for all actions executed by Splash Module. We highly recommend creation of a dedicated user for Splash. Be aware Splash Module will take care of Users rights policy, this user must have appropriated right on Dolibarr.

Default Warehouse / Bank Account / Payment Method

Define these values to be used if no value is specified.

Check results of Self-Tests

Each time you update your configuration, module will verify your parameters and ensure communication with Splash is working fine. Ensure all tests are passed... this is critical!
